Sustainable Development and Climate Change:
A Multidisciplinary Program in Italy

May 28 - June 29, 2018 – Venice, Italy (5 weeks)
PUBP 3320 (3 credits) and PUBP 3600 (3 credits)

Program Directors: Dr. Alice Favero, SPP and Dr. Emanuele Massetti, SPP

*Open to all Majors*

• Understand the key ingredients of a sustainable development pathway.
• Learn why nations fail by walking the streets of Venice and Rome.
• Explore how and why climate change is going to affect people, the economy and the environment all over the world.
• Experience first-hand climate change challenges for vulnerable cities and vulnerable ecosystems.
• Meet the Italian experts on sustainable development and climate change.
• Find out how models are used to formulate future climate, economic and technological scenarios.
• Discover the MOSE, a state-of-the-art system of mobile water barriers to protect Venice from flooding.
• Discuss with the experts on food, water and land at the international Food and Agriculture Organization (FAO).
• Give a last glimpse to the disappearing glaciers from the top of the Italian Alps.
