

Join the Equity and Sustainability VIP

Outdoor Classroom Project

In this 1 to 2 credit course, we are designing and constructing an outdoor classroom in partnership with the West Atlanta Watershed Alliance (WAWA), an environmental justice organization in southwest Atlanta. You have the opportunity to apply classroom knowledge to a real-life project!

Desired Majors

- Architecture
- Building Construction
- Civil Engineering
- Environmental Engineering
- Literature, Media, and Communication

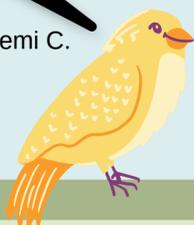

Undergraduate & graduate students welcome, plus students from other majors!

Benefits

- Project management skills
- Contribute design, architecture, construction, and engineering skills to a real world project
- Community engagement experience
- Field trips
- Credits can fulfill requirements for sustainable cities minor

This VIP provides a way to connect with GT's neighboring communities. It's given me a lot of insight into implementing environmental justice work on a community level.

Noemi C.

The VIP is a great way to learn and build skills in community engagement! Engaging with the work of nonprofits in Atlanta also provides a lot of insight into sustainable initiatives.

Brian R.

This is a fantastic hands-on opportunity to collaborate with students from other majors, backgrounds, and specializations while implementing asset-based community development.

Alex K.
